## Project Design Phase-II Technology Stack (Architecture & Stack)

| Date          | 03 October 2022   |
|---------------|---|
| Team ID       | PNT2022TMID31710  |
| Project Name  | Project - Real-Time River Water Quality Monitoring and Control System |
| Maximum Marks | 4 Marks   |

## **Technical Architecture:**

The Deliverable shall include the architectural diagram as below and the information as per the table 1 & table 2

Table-1 : Components & Technologies:

| S.No | Component                       | Description                     | Technology                                      |
|------|---------------------------------|---------------------------------|---|
| 1.   | User Interface                  | Web UI, Mobile App              | Node – Red, Kubernetes, MIT mobile app inventor |
| 2.   | Application Logic-1             | Generate random data            | Python  |
| 3.   | Application Logic-2             | Generate random sensor data     | IBM Watson IOT Platform                         |
| 4.   | Cloud Database                  | Database Service on Cloud       | IBM DB2, IBM Cloudant,                          |
| 5.   | External API-1                  | Send SMS to customer            | Fast SMS API                                    |
| 6.   | Infrastructure (Server / Cloud) | Application Deployment on Cloud | Cloud Foundry, Kubernetes                       |

## **Table-2: Application Characteristics:**

| S.No | Characteristics          | Description   | Technology  |  |
|------|--------------------------|---|---|--|
| 1.   | Open-Source Frameworks   | open-source frameworks used to develop our project                          | Node – Red, IBM Cloudant, IBM Watson IOT Platform |  |
| 2.   | Security Implementations | Use of Login facility with username and password for individual user        | Password protection in MIT App                    |  |
| 3.   | Scalable Architecture    | Web Ui designed for use in Mobile and computer with adaptive screen size    | Node – Red (Web UI)                               |  |
| 4.   | Availability             | Available for the user in both web UI and Mobile App                        | Node – Red(Web UI), MIT App(Mobile App)           |  |
| 5.   | Performance              | Give accurate results and immediate alert in case of contamination of water | Node – Red(Web UI), MIT App(Mobile App)           |  |
